Brook:

I am in the process of preparing a letter regarding your proposed operation.

I have received confirmation from the Forest Service that they are prepared to approve your operation as well. The only issues that they had were

1. The reclamation surety needs to be finalized (see discussion below), proposed amount is OK
2. your 404 stream alteration permit needs to be approved (the Division was informed that application has been made and is under review by the appropriate agencies.

DOGM has these same concerns.

to resolve the 404 stream alteration permit issue, all you will need to do is submit a copy of the approval letter to DOGM and the Forest Service.

To finalize the reclamation surety, you will need to contact DOGM's bonding coordinator, Jed Pearson at (801) 538-5382 or email at jedpearson@utah.gov . He informed me a week ago that the surety form and reclamation contract that you submitted needed corrections made. (NOTE: Jed may have already contacted you regarding this issue and it is being resolved. I have not seen him yet, so I am not certain of the current status.).

The letter I am preparing will essentially indicate that the Division considers your Notice complete and that we need the surety and reclamation contract finalized. It will also indicate that you need your 404 stream alteration permit approved before you begin operations.

Please feel free to call me (801) 538-5310 or send me an email if you have any questions.

LYNN
